

# Extruder Burst Plugs

Extruder Burst Plugs • OEM/RUPTURE DISC PLUGS

## FEATURES

- Consistent bore diameter
- Pressure tested at rated burst pressure
- High quality control
- Leak tight, soldered disc
- One piece stainless steel machined body
- Disc flush with pressure vessel wall

## Extruder Burst Plugs

Oseco's extruder burst plugs place the rupture disc flush with the pressure vessel wall, ensuring there are no cavities where products can stagnate and solidify. The rupture disc is soldered to the barrel to prevent any possible leakage, regardless of pressure and temperature.

Oseco's plastic extruder burst plugs are offered in a wide range of burst pressures with lead times as low as 10 days. Contact an Oseco sales representative for details on our Stock to Dock program.
